**Office Action Summary**

Application No.

10/775,234

Applicant(s)

KIM ET AL.

Examiner

An T. Luu

Art Unit

2816

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 04 August 2005.  
 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.  
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 6-9 is/are pending in the application.  
 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
 6) ☒ Claim(s) 6-9 is/are rejected.  
 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.  
 10) ☒ The drawing(s) filed on 8-4-05 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
 a) ☒ All b) ☐ Some \* c) ☐ None of:  
 1. ☒ Certified copies of the priority documents have been received.  
 2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)  
 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
 Paper No(s)/Mail Date \_\_\_\_\_.  
 4) ☐ Interview Summary (PTO-413)  
 Paper No(s)/Mail Date. \_\_\_\_\_.  
 5) ☐ Notice of Informal Patent Application (PTO-152)  
 6) ☐ Other: \_\_\_\_\_.

### **DETAILED ACTION**

Applicant's Amendment filed on 8-4-05 has been received and entered in the case.

Claims 6-9 are pending. The rejections set forth in the previous Office Action are maintained as indicated below.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The limitation "the second terminal of the amplification unit", lines 10-11 of claim 6, lacks antecedent basis.

Claims 7-9 are rejected for being dependent on the rejected claim, as noted above.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 6, 7 and 9, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipate by the Kimura reference (U.S. Patent 5,748,041).

Kimura discloses in figure 1 a mixing circuit comprising an amplification unit (i.e., Q3-5) having an input terminal (i.e., base of Q3) and an output terminal (i.e., emitter of Q3), and amplifying a signal Vc applied to the input terminal to output it to the output terminal; a mixing

Art Unit: 2816

unit (Q1, Q2) having first, second and third input terminals (i.e., Vi+, Vi- and common node at emitter terminals), and first and second output terminals (i.e., Vout+ and Vout-), the third input terminal being connected to the output terminal of the amplification unit, the mixing unit mixing signals respectively applied to the first and second input terminals with a signal supplied to the third input terminal, to respectively output the mixed signals to the first and second output terminals (i.e., operational of an AGC amplifier circuit, see Abstract); and a current source 3 for providing a specific quantity of current to the third input terminal of the mixing unit as required by claim 6. Further, the newly added limitation "*the quantity of current being provided to the mixing unit being equal to the specific quantity of current provided by the current source and a quantity of current provided by the amplification unit*" is seen as inherent since the third input of the mixing circuit are connected to both current source and a current outputted from the amplification.

As to claim 7, the amplification unit (i.e., Q3-5) comprises an amplification element Q3 having a first terminal (base) that forms the input terminal, a second terminal (emitter) that forms the output terminal and a third terminal (collector), wherein the quantity and direction of current flowing from the second terminal to the third terminal are varied on the basis of the level of a voltage applied to the first terminal; and a degeneration impedance Q4 connected between the third terminal of the amplification element and a voltage source Vcc.

As to claim 9, figure 1 discloses the mixer circuit comprising a first amplification element Q1 having a first terminal (i.e., base) that forms the first input terminal, a second terminal (i.e., collector) that forms the first output terminal and a third terminal (i.e., emitter), wherein the quantity and direction of current flowing from the second terminal to the third

Art Unit: 2816

terminal are varied on the basis of the level of a voltage applied to the first terminal; a second amplification element Q2 having a first terminal (base) that forms the second input terminal, a second terminal (collector) that forms the second output terminal, and a third terminal (emitter) connected to the third terminal of the first amplification element to form the third input terminal, wherein the quantity and direction of current flowing from the second terminal to the third terminal are varied on the basis of the level of the voltage applied to the first terminal (i.e., basis operation of a transistor); and first and second load impedances ( $R_L$ ) connected between the second terminals of the first and second amplification elements and a voltage source  $V_{cc}$ , respectively.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 8 are rejected under 35 U.S.C. 103(a) as being obvious over the Kimura reference (U.S. Patent 5,748,041) in view of the Fong reference (U.S. Patent 6,147,559).

Kimura discloses a mixer circuit comprising all the claimed limitations as required by claim 8 except for teaching a capacitor connected between the first and second terminals of the amplification element as required by the claim.

Fong discloses in figure 1 an amplification element Q1 having a capacitor  $C_f$  coupled between the first and second terminals of the amplification element as required by claim 8.

Art Unit: 2816

It would have been obvious to one skilled in the art at the time the invention was made to incorporate the teaching of Fong into that of Kimura to reduce parasitic capacitance between terminals of a transistor.

A skilled artisan in the art would be motivated to utilize the teaching of Fong for the benefit of improving linearity and noise figure of the electronics circuit (i.e., mixer circuit).

### ***Response to Arguments***

7. Applicant's arguments filed 8-4-05 have been fully considered but they are not persuasive.

Applicant has argued that Kimura teaches "*the quantity of current provided to the mixing unit and the amplification unit is provided solely by the current source*".

Examiner respectfully disagrees since the current provided to the mixing circuit at common node of Q1 and Q2 is provided by both the current source 3 and the current from a current mirror (Q4 and Q5) of the amplification unit. Therefore, amended claim 6 still read on the Kimura reference.

### ***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2816

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to An T. Luu whose telephone number is 571-272-1746. The examiner can normally be reached on 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
